

K&H R

Firearms Group

FULL PRODUCT CATALOG

NINTH EDITION

A Letter from the Owner: Justin Moon

For over 25 years, Kahr Firearms Group has been dedicated to the art of producing exceptional American made firearms. Beginning with the original K9 pistol in 1995, Kahr has focused on providing American shooters with accurate, durable, reliable, and fun firearms. The exercise of our fundamental freedom to keep and bear arms is near and dear to all of the staff at Kahr Firearms Group. This has driven Kahr's efforts to provide Americans with safe, high quality firearms that allow enjoyment of that freedom in many exciting ways. From Kahr Firearms comes a range of practical, concealable pistols. From Magnum Research we offer guns with unrivaled power and precision. From Auto-Ordnance we created a range of historical firearms honoring our nation's history. Our family of brands truly has a gun for every shooter. Kahr Firearms Group exists to ensure Americans can fully exercise their fundamental liberty enshrined in the Second Amendment, and enjoy themselves while doing so!

Semi-automatic firearms are in common use for lawful purposes and are protected by the Second Amendment. Kahr's devotion to the Second Amendment has led the company to become actively involved in preserving America's liberty. The decision to move manufacturing away from states that infringe on those rights was a direct statement of our resolve. Kahr's leadership has become active in political efforts to preserve not just the Second Amendment, but all the fundamental rights guaranteed by the Constitution. American shooters can be confident that they have a partner in the Kahr Firearms Group, who will stand firm for freedom and the American way of life. This is our history, and we are proud to be a part of America's history.

As the founder and owner of Kahr Firearms Group, I want to personally thank our customers for over 25 years of patronage and support! Without our customers, we would not be able to continue providing accurate and reliable products. We remain devoted to the needs of our customers, and will continue providing them exceptional firearms for many years to come. We will continue to stand for freedom and the right to keep and bear arms!

Gratefully yours,

Justin Moon

Founder, and CEO

KAHR ULTRA-COMPACT DOUBLE ACTION ONLY HANDGUNS

KAHR BARREL

The Kahr barrel begins its transformation from a solid round billet of proprietary, high tensile strength steel, 3 inches in diameter and 30 inches long. In the temperature-controlled environment of the Lothar Walther factory, the barrel stock is gun drilled and rifled to match grade tolerances.

At the Kahr factory, the barrel stock is precisely cut to length and CNC machined. Nearly 75% of the solid steel billet is machined away to produce a single Kahr barrel. This intensive production method provides the greatest material integrity and tightest tolerances. It was chosen to ensure the best quality barrel possible.

Kahr quality: unmatched at any price.

KAHR SLIDE

The Kahr slide is made from 416 Stainless Steel bar stock and is also precision computer machined. This component is heat-treated and tempered to optimize durability.

The combination of the engineering design, quality materials, and precise manufacturing results in the slide's toughness and compact size. Kahr's slide is the slimmest design among the major pistol brands.

Kahr quality: unmatched at any price.

KAHR SLIDE STOP PIN

Kahr Arms is a revolutionary company committed to quality. One example of this dedication is the extreme lengths went to researching the material for the slide stop pin. A proprietary steel with unmatched toughness and elongation characteristics was selected after exhaustively surveying and testing numerous unique alloys. The material is so tough that grinding operations have to be employed in order to manufacture the part.

Although the material and the manufacturing process greatly increase the cost of the part, Kahr believes that the resulting performance benefits vastly outweigh the expense incurred each time a pistol is assembled. This is just another example of Kahr's commitment to provide shooters with quality unmatched at any price.

KAHR MAGAZINE

The Kahr magazine tube is constructed of corrosive resistant 400 series Stainless Steel and heat treated to 50 Rockwell for durability. Plasma-welding the stamping to form the magazine tube creates a smooth interior surface for the "ammunition stack" to rise and feed, joining the body by an "unbreakable" seam. During the finishing process the magazines is tumbled to provide a smooth, consistent burr-free surface. There are no sharp edges on which the shooter can be cut.

Another feature unique to Kahr magazines is the steel slide stop pin contact insert in the magazine follower. This innovative insert assures that the follower will reliably engage the slide stop lever and lock the slide, magazine after magazine. With this feature the shooter does not have to be concerned about the inevitable wear that accompanies most plastic followers.

Kahr quality: unmatched at any price.

UNIQUE DESIGN OF KAHR

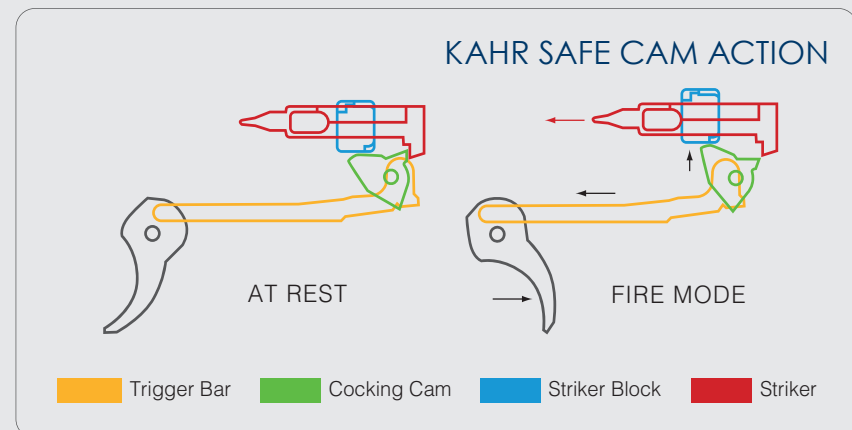

The incomparable Kahr's cocking cam trigger system employs a cam to unlock the passive safety, finish cocking, and then release the firing pin. The system provides a safe and unbelievably smooth double action only trigger stroke that remains fast to fire in critical defensive situations.

Kahr's "offset barrel" design places the trigger mechanism beside the barrel lug, raising the shooter's hand close to the center line of the bore. This results in a remarkable degree of shooting comfort and control, while reducing muzzle climb and felt recoil.

A self-cleaning extractor is specially designed so that powder residue is forced away from the extractor, assuring that it will continue to function shot after shot. Furthermore, the extractor is designed so that it employs the slide itself to limit its movement. This means that failures to extract are nearly impossible.

These innovations give the shooter an advantage in critical self-defensive situations. The Kahr design and its quality manufacturing provide unmatched value in a compact handgun—especially important when your life depends on it.

Kahr quality: unmatched at any price.

KAHR ARMS: THE FIRST AND BEST CHOICE FOR CONCEALED CARRY

PREMIUM SERIES MODELS

KAHR PREMIUM SERIES

- ▶ SHIPS IN LOCKABLE, HARD PLASTIC CASE
- ▶ SHIPS WITH THREE MAGAZINES
- ▶ LIMITED LIFETIME WARRANTY

The K Series steel 9mm was the first design rolled out of the factory in 1995, and the line of concealed carry handguns has continued to grow ever since. The K Series have proven themselves as being the best concealed carry/back-up gun on the market by offering high quality and total reliability in a compact, thin package.

Other features include a Lothar Walther 3.5" polygonal rifled match grade barrel, smooth DAO trigger, matte stainless and an option for night sights.

PREMIUM SERIES MODELS

KAHR PREMIUM SERIES

- ▶ SHIPS IN LOCKABLE, HARD PLASTIC CASE
- ▶ SHIPS WITH THREE MAGAZINES
- ▶ LIMITED LIFETIME WARRANTY

In 1995, the Kahr K9 became the first highly successful subcompact 9mm semi-automatic handgun. It was followed soon after by its smaller sibling, the MK9.

Building on the proven reliability of the subcompact K9, the MK9 reduced the size footprint even further, offering a 3" Lothar Walther polygonal rifled, match grade barrel, with a six round magazine capacity. The all steel construction of the MK9, recoil reducing design features, and smooth double-action only trigger, makes it an exceptionally easy shooting pistol.

The MK9 is available with polished or matte stainless slide and frame, as are optional night sights. With slender, elegant lines, the K9 and MK9 pistols continue to represent the ideal all-steel pistols for concealed carry.

PREMIUM SERIES MODELS

For over 25 years, Kahr Arms have been the experts at making the perfect carry pistol. Beginning with the original K9, Kahr pistols are the optimal combination of accuracy, compactness, reliability, and performance. The latest evolution of the family further enhances the Kahr concealed carry formula, refining the design of the P series pistols by adding two new 9mm variants: the P9-2, and TP9-2.

Each of these pistols carries forward the slim, smooth, lightweight design of the P9 and TP9 handguns. Every P series gun has an accurate, match grade, polygonal rifled Lothar Walther barrel. With the "Dash Two" evolution, an accessory rail is included on the dust cover. Front cocking serrations are machined into the slide. The mag catch is improved. TruGlo® tritium night sights are standard on both models. The slide is blackened stainless, with a black polymer frame. Each gun comes with two flush fitting magazines, and a limited lifetime warranty.

The P9-2 and TP9-2 pistols are the next evolution in the perfect concealed carry pistol!

VALUE SERIES MODELS

Kahr's full frame, value-priced firearms are designated the CT Series. These pistols feature a full-size polymer frame with a matte stainless steel slide. Each is equipped with drift adjustable, white bar-dot sights.

For decades Kahr has offered gun enthusiasts the option of both compact and full-frame firearms. The popular TP Series have become legendary performers. However, not all shooters have the same budget for purchasing firearms. Kahr recognizes this and answered the call from customers wanting to stretch their gun buying money as far as possible. Kahr took the best features of their TP Series and without compromising detail and quality, developed the value-priced CT Series.

Like all Kahr pistols, the CT4545, CT9093, and CT3833 allowing for an industry-leading slim, clean single-stack design—ideally suited to both concealed carry and home defense.

VALUE SERIES MODELS

The Kahr CW Series has the combination of features that makes it the best Concealed Carry Pistol in the market. It has the ideal combination of stopping power and shooting comfort, and is smaller, thinner and lighter than competitive brands. The CW Series natural point of aim and low-felt recoil make them the ideal guns to shoot and carry.

With the introduction of innovative manufacturing processes in the production of the CW Series, the Kahr pistol represents an unrivaled value.

VALUE SERIES MODELS

The CM Series, which debuted in spring 2011 with the CM9, takes the value priced features from Kahr's CW series (3.6" barrel, 9 mm and .45 ACP models) and incorporates these features into a smaller 3" barrel package. The CM Series have the same external dimensions as the PM Series, which make it ideal for concealed carry by licensed civilians and law enforcement personnel.

The CM series slide is only .90 - 1.00 inch wide and machined from solid 416 stainless slide with a matte finish, each gun is shipped with one stainless steel magazine with a flush baseplate. Magazines are USA made, plasma welded, tumbled to remove burrs and feature Wolff Gunsprings. The magazine catch in the polymer frame is all metal and will not wear out on the stainless steel magazine after extended use.

Kahr offers the CM series at a great value price but does not compromise on the features, accuracy or reliability found in all Kahr pistols.

TOMMY GUN

Thompson® 1927A-1 BOOTLEGGER
SPECIAL EDITION

.45 ACP | MODEL: T1-14C3

CUSTOM MODEL

THOMPSON SUBMACHINE GUN

General John T. Thompson, a graduate of West Point, began his research in 1915 for an automatic weapon to supply the American military. World War I was dragging on and casualties were mounting. Having served in the U.S. Army's ordnance supplies and logistics, General Thompson understood that greater firepower was needed to end the war.

Thompson was driven to create a lightweight, fully automatic firearm that would be effective against the contemporary machine gun. His idea was "a one-man, hand-held machine gun. A trench broom!" The first shipment of Thompson prototypes arrived on the dock in New York for shipment to Europe on November 11, 1918 the day that the War ended.

In 1919, Thompson directed Auto-Ordnance to modify the gun for nonmilitary use. The gun, classified a "submachine gun" to denote a small, hand-held, fully automatic firearm chambered for pistol ammunition, was officially named the "Thompson submachine gun" to honor the man most responsible for its creation.

With military and police sales low, Auto-Ordnance sold its submachine guns through every legal outlet it could. A Thompson submachine gun could be purchased either by mail order, or from the local hardware or sporting goods store.

THE ROARING 20s

The decade known as the Roaring 20's saw a new market for the Thompson, with law enforcement agencies seeking additional firepower to combat organized criminals and the "motor bandits" plaguing a Depression crippled nation. Federal and state law enforcement agencies bought the Tommy Gun to even the odds against the criminals they faced. Some gangsters also made use of the "Chicago Typewriter" in their criminal escapades. This era cemented the Thompson in American culture as an icon of the Roaring 20's, and on the big screen where it was immortalized in motion pictures as a tool for both good and evil.

TRUSTED COMPANION FOR TROOPS

In the mid '20s the Thompson submachine gun was adopted for service by an official military branch of the government. The U.S. Coast Guard issued Thompsons to patrol boats along the eastern seaboard. In 1928, Auto-Ordnance made a new Navy model to be used by Marines on Naval gunboats.

World War II began, and the Army recognized the need for a submachine gun. The Thompson was simplified in design for increased reliability. The compensator and cooling fins were removed, as well as the front grip. Drum magazine compatibility was eliminated, and a 30 round magazine standardized. The Tommy Gun became the constant companion of American soldiers. Many stories tell how the firepower of the Thompson submachine gun protected troops, and helped win battles in Europe and the Pacific.

HISTORICAL RESEARCH

Kahr Firearms Group is proud to preserve the legacy of Auto-Ordnance Corporation, the original maker of the famous Thompson submachine gun. To assure the historical accuracy of the Auto-Ordnance design, Kahr researched the original engineering drawings. Hundreds of U.S. military microfiche and hand drawings of the Thompson models dating back to 1919 were examined.

THE AUTO-ORDNANCE THOMPSON: AN AMERICAN ICON

The Auto-Ordnance Thompson is a historical, semi-automatic firearm. Each gun is a union of original design, quality materials, and fine workmanship. The Tommy Gun represents the preservation of an American legacy of ingenuity and craftsmanship. Carried by lawmen of the 1920s, and trusted by GIs during World War II, owning an Auto-Ordnance Thompson is an opportunity to experience the feel of the iconic original.

OWN A PIECE OF

.45 ACP | MODEL: **T150DCR** HARD CHROME

- ▶ Accepts both stick and drum magazines
- ▶ Ships with 50 round drum and 20 round stick magazines

Auto-Ordnance is proud to introduce an exciting and classy look to their century-old Thompson, historically referred to as the “Chicago Typewriter®”. The Thompson 1927A-1 semi-automatic carbine is now offered in a Gold plated finish and also a Polished Chrome.

Either of these time-honored reproduction semi-auto carbines will undoubtedly impress your friends when you take it out to the shooting range. These guns are offered in .45 ACP and have a 16.5” finned barrel (18” with compensator), with a 1 in 16

right-hand twist. The frame is constructed in steel with either a Gold plated finish or a Polished Chrome finish. The gun weighs 13 lbs. and has an overall length of 41”. Other features include a pinned in front blade and an open rear adjustable sight. The stock is fixed and is made from luxurious American Walnut and has a vertical foregrip. These two models each ship with one 50-round drum and one 20-round stick magazine. The magazines are plated in either polished gold or chrome.

The Auto-Ordnance 1911A1 series incorporates GI specs, and features a matte black finished frame, barrel, and slide. The precision manufactured, carbon steel slide, sear, and disconnector are heat treated properly for durability over many thousands of rounds. Models are available in .45 ACP, and 9mm. Barrel lengths are offered in the original 5", and the Commander length 4.25". The low-profile sights feature a blade front sight and a rear drift adjustable for windage. The grip is brown checkered plastic, with wood optional on 1911BKOW models.

The Auto-Ordnance 1911A-1 is 100% made in the USA.

COLD DEAD HANDS 1911

MODEL: 1911TCAC15

.45 ACP | **7 ROUND**

- ▶ Barrel: 5"
- ▶ Length O/A: 8.6"
- ▶ Weight: 2.3 lbs
- ▶ Sights: TruGlo Day Sights
- ▶ Grips: Custom Aluminum Grips
- ▶ Magazine: 7 round

The "Cold Dead Hands 1911" features a coiled serpent and skull engraved on its aluminum grips, with the statement "Pry it From My Cold Dead Hands". "Shall not be infringed" is engraved on the left side of the slide, and "76" is circled with thirteen stars on the right.

The Cold Dead Hands 1911 starts as an Auto-Ordnance Stainless a 5" Auto-Ordnance Stainless 1911, chambered in .45 ACP. Its slide and frame are stainless steel, with TruGlo® day sights, full length guide rod, high sweep beavertail, skeletonized trigger, checkered front strap, serrated and ported slide, with a match grade barrel. The finish is a custom Cerakote mix of Light Sand and Plum Brown, completed with a weathered effect. It is made entirely in the United States. One seven round magazine is included.

Each custom firearm is a unique work of art containing hand created content. As a result, no two firearms are exactly alike, and features may vary between individual pieces. Final products may not exactly match depictions in advertisements.

1911TCAC6N TruGlo® Night Sights
1911TCAC6 TruGlo® Day Sights

STAINLESS 1911

MODEL: 1911TCAC6N / 1911TCAC6

.45 ACP | 7 ROUND

- ▶ Barrel: 5"
- ▶ Length O/A: 8.6"
- ▶ Weight: 2.3 lbs
- ▶ Sights: TruGlo Night Sights (1911TCAC6N)
TruGlo Day Sights (1911TCAC6)
- ▶ Grips: Gray G10 Grips
- ▶ Magazine: 7 round

The American made Auto-Ordnance 1911TCAC6N model incorporates a variety of upgrades popular with modern shooters. It features an adjustable trigger, skeletonized hammer, full-length recoil guide rod, extended beavertail grip safety, and extended magazine release. Frame, slide, and barrel are made from high quality stainless steel. The slide, sear, and disconnect are precision manufactured, then heat treated properly for durability over many thousands of rounds. The slide has decorative cuts, and front cocking serrations. Both mainspring housing and front strap are machined checkered at 20 lines per inch. The gun is finished in Savage Stainless Cerakote®. The match grade barrel is 5" in length, and chambered in .45 ACP. Two models are available, one with TruGlo® night sights and the other with TruGlo® day sights. Grips are gray G10. The pistol has a thumb safety, grip safety, and firing pin block. Each Auto-Ordnance stainless steel 1911 ships with one 7-round .45 ACP magazine.

BOOTLEGGER 1911

MODEL: 1911BKOC9

.45 ACP | 7 ROUND

- ▶ Barrel: 5"
- ▶ Length O/A: 8.6"
- ▶ Weight: 2.3 lbs
- ▶ Sights: Blade front, Rear drift adjustable for windage
- ▶ Grips: Engraved American Walnut Wood Grips
- ▶ Magazine: 7 round

The Thompson is often called the "gun that made the 20's roar", but it was not the only reason for that saying. In fast cars with loads of moonshine, 1920's bootleggers roared down country roads, evading the law and delivering white lightning to speakeasies. Lawmen raced after the motor bandits, wielding Tommy Guns and 1911s. It was not long before Hollywood depicted these duels on the big screen. The Roaring 20's blazed a trail into American pop culture and history.

Auto-Ordnance's latest custom gun commemorate the era with the "Bootlegger" 1911. Each gun is artfully engraved with depictions of newspaper print, and historical images from the time.

The 1911 slide is engraved "Bootlegger Prohibition Edition", and "Proof Tennessee Moonshine". Beautiful scrollwork covers the American Walnut wood furniture, and sections of the steel. The finish is distressed Burnt Bronze Cerakote with a clear coating overlaid. The wood furniture is also distressed and then stained. The 1911 features a 5" barrel, and one seven round magazine. The gun is chambered in .45 ACP.

TANKER 1911

MODEL: 1911BKOC11

.45 ACP | 7 ROUND

- ▶ Barrel: 5"
- ▶ Length O/A: 8.6"
- ▶ Weight: 2.3 lbs
- ▶ Sights: Blade front, Rear drift adjustable for windage
- ▶ Grips: Checkered Wood Grips with US Logos
- ▶ Magazine: 7 round

"Built like a tank" is a phrase that has entered the American lexicon as a means to describe hardware that is durable, strong, and nearly indestructible. The term may have originated in describing armored fighting vehicles, but it also clearly describes the 1911. It is only fitting then that Auto-Ordnance continue the series of WWII commemorative guns with the "Tanker 1911", dedicated to the memory of the brave American soldiers who faced the enemy in steel chariots like the M4 Sherman Tank.

Each Tanker 1911 slide and frame are Cerakoted in Army O.D. Green. The iconic white star of the Sherman Tank is engraved on the slide and frame, adding a touch of historical character. The "U.S." logo is engraved on the beautiful, checkered wood grips, providing a natural and elegant look. This all steel, GI style 1911 features a 5" barrel, chambered in .45 ACP. Sights, trigger, grip safety, and controls are the classic GI pattern. One seven round magazine is included.

MADE WITH PRIDE IN THE U.S.A.

HISTORY OF MAGNUM RESEARCH

Magnum Research Inc.® (MRI) has been highly successful since its purchase by Kahr Firearms Group in 2010. This is due to our loyal customers and suppliers, dedicated employees, and highly experienced leadership. Magnum Research's founders, Jim Skildum and John Risdall, had been involved with the company since 1979. Both men oversaw the ascent of the Desert Eagle® Pistol from a concept on paper to a pop culture icon, commonly seen in movies, television, and video games. Over the past 40 years MRI continually improved and expanded the Desert Eagle pistol series. Originally manufactured in Israel by Israel Military Industries, MRI moved production to their factory in Pillager, MN, in 2009. Besides offering the basic black finish, MRI has developed a line-up of the Desert Eagle pistols in a number of distinctive and appealing finishes including stainless steel, black, "Tiger Stripe", and a variety of modern cerakote finishes. The Desert Eagle is currently produced in four magnum calibers.

THE MAGNUM RESEARCH FAMILY

MRI has expanded from the Desert Eagle to offer a family of exceptional products. The high quality MR1911 pistols come in a variety of calibers and configurations, all manufactured by BUL in Israel. The BFR (Biggest Finest Revolver), is an MRI original design, manufactured at the Minnesota factory. This series of all stainless steel, single action revolvers is available in numerous calibers, both off the shelf and custom, and two cylinder sizes. The SwitchBolt rimfire rifles in .22LR and .22WMR feature numerous options, including lightweight graphite barrels, the aluminum tension barrel, and the new integrally suppressed TTS model. Magnum Research also produces precision bolt action rifles called the Mountain Eagle. Chambered in a variety of centerfire calibers, they are custom made to order on a Remington® 700 style action made by Defiance Machine featuring our patented carbon fiber barrel and a variety of stock options.

THE ICONIC DESERT EAGLE PLATFORM

The entire Mark XIX Component System is based on a single platform. With its gas operation, rotating bolt and all-steel construction, this is the heart of the Desert Eagle. Once you've purchased a Mark XIX Desert Eagle Pistol, you can change the barrel length or the caliber in seconds using caliber conversion components. The Mark XIX Desert Eagle Pistol offers true interchangeability between four magnum calibers: .357 Magnum, .44 Magnum, .429 DE or .50 A.E. Owning a Desert Eagle means owning an American icon!

DESERT EAGLE CA APPROVED MODELS

Magnum Research and Kahr Firearms Group remain dedicated to supporting the Second Amendment rights of California gun owners. The Desert Eagle pistol is available through dealers and distributors in California. Specifically approved models can be had in five finishes: black, burnt bronze, tungsten, brushed chrome, and polished chrome. All California approved Desert Eagles feature a claw style thumb safety, fluted barrel with two slot Weaver style accessory rail, and are chambered in .44 Magnum. Black finished Desert Eagles come with a wrap around grip featuring the "IWI" logo. Guns in all other finishes come with soft synthetic rubber grips, emblazoned with the "Eagle" logo. All Desert Eagle pistols are made entirely in the United States.

The Baby Eagle is known by the industry as having one of the most reliable mechanisms in the world, and this is evident in the new Baby Eagle III Series. It features a precision land and groove rifled barrel, ambidextrous teardrop-shaped decocking mechanism on the slide, smooth trigger pull, compatible magazines with all Baby Eagle II models, and a reversible magazine catch for either left or right-handed shooters. The integral tactical accessory rail makes it ideal for a variety of laser and light accessories.

Magnum Research trimmed down the slide and frame, reducing weight, and making its shape even more like its big brother the Desert Eagle. The Baby Eagle III features

a black polymer frame with a high quality carbon steel slide done in a black oxide matte finish. They are available in both full or semi-compact sizes, in 9mm and 40 S&W calibers. The 9mm is available in 10 and 15 round capacity models, the 40 S&W is available in 10 and 12 round capacity models.

Other features include a double/single action (DA/SA) trigger with a 12 lb. trigger pull (DA), and 4 lb. single action. The rifling is right-hand twist, 6 lands and grooves. Each gun features combat-type, white three dot fixed sights. The Baby Eagle III ships with two magazines, a cleaning kit, and a hard plastic case.

FULL SIZE POLYMER FRAME

- ▶ Barrel: 4.43"
- ▶ Length O/A: 8.5"
- ▶ Height: 5.65"
- ▶ Slide Width: 1.1"

All Magnum Research 1911s feature the classic series 70 design, popular with many fans of John Browning's legendary handgun. Slide and frame rails are machined to exacting tolerances, delivering accuracy that will match any custom gun. Finish options include matte black or stainless steel. Standard features on all MR1911s include a stainless match barrel, solid guide rod, G10 grips, crisp skeletonized trigger, stainless beavertail grip safety, extended safety lever, extended magazine release, lowered and flared ejection port, skeletonized hammer, checkered frame and mainspring housing, and slide front cocking serrations.

The 5" G, and 4.33" C models are equipped with Novak style sights, while the 3" U model has an adjustable rear sight. The U and C models use a bushingless bull barrel. All MR1911s include two magazines. Magnum Research 1911s chambered in .45 ACP have a traditional feed ramp machined into the frame. Pistols chambered in 10mm use a ramped barrel. Regardless of which model you choose, the MR1911 offers an incredible set of custom 1911 features at a very affordable price!

Magnum Research's BFR is truly the biggest, finest revolver on the market today. Like the legendary Desert Eagle, it is entirely manufactured in the US and designed as a magnum from the ground up. The BFR is all stainless steel, with a precision grade barrel that delivers unmatched accuracy using lead or jacketed bullets. The BFR is the most powerful production single action handgun made, with numerous calibers and two frame sizes to choose from. Engineered for the hunt, the BFR can take everything from grouse to grizzly. Choose your chambering and frame size, then have your favorite gun dealer order the BFR for you.

SWITCHBOLT™ RIMFIRE RIFLES

The extraordinary SwitchBolt™ .22LR rifles are an evolutionary extension of the famously lightweight and accurate MLR rimfire rifles from Magnum Research. The SwitchBolt™ is born of extensive research and development, tested and perfected on the professional speed shooting circuit. Built in the USA, the SwitchBolt™ receivers, with integral Picatinny rail, are machined from a 6061-T6 extrusion, then hard coat anodized for an extremely durable finish. SwitchBolt™ rifles come equipped with a bolt handle on the left side of a right handed bolt. The result is an extremely fast and handy configuration for a right-handed shooter, whose trigger hand never has to leave the stock to charge the rifle.

The lightweight SwitchBolt™ rifle is available in many barrel and stock configurations. Choose from patented carbon barrels, patented Ultra tensioned barrels, or patent pending TTS-22 suppressed barrels. These can be mounted in a variety of stocks, including ambidextrous models in wood or polymer. Select the SwitchBolt™ that best fits your needs and budget, then visit your favorite local gun dealer to order. This is your chance to own a legendary rifle designed to be the most accurate, lightweight rimfire on the market today!

SwitchBolt™ Receiver
SS1022LR
